[www.kincaidfurniture.com](http://www.kincaidfurniture.com)

Kincaid, in keeping with its tradition in styling, materials and finish, crafts its furniture collections (with the exception of Treasures) using primarily solid woods selected for grain clarity, color coordination, and design. Combinations of different solid wood species are used within each collection. Not all exposed surfaces of every collection are constructed of solid wood. Wood products, multi-layer plywood, veneers and laminates are used for certain structural elements, including exposed surfaces that support leather, cane wicker and other non-wood materials, as well as in select components, including some decorative table tops, table skirts, bed rails, interior surfaces, back panels, pullout trays, serving surfaces, etc. Some of our furniture features metal, stone, marble, granite or a composite material with the appearance of these elements.
