**GO SOLAR AND SAVE!**

Never Pay for Hot Water!

Install a \$4500 Solar Water Heating System for as little as \$2150\* and you'll save up to 30% on your electric bill!

Heat Your Pool!  
A solar system is the most efficient and cost effective way to heat your pool. You'll be able to stay home more, enjoy your pool, and great times with your family and friends.

Or Install a Photovoltaic System for your Home or Business!  
PV is the most energy productive of all solar products. It's your best insurance against soaring electric rates. In fact, under the recent "Net Metering" law, the extra electricity you produce is "sold" back to the utility company and a dollar-for-dollar amount is credited to your account!
