

# How are you dealing with your **Back Pain?**

**Eliminate pain without drugs or surgery**

Are you or someone you know suffering from herniated or bulging discs, sciatica, degenerative disc disease, stenosis, or chronic back or neck pain?

**Computerized Spinal Decompression might be your solution.**

Decompression relieves pain by decreasing nerve root pressure. By creating a negative pressure within the disc an attempt is made to restore lost disc height by forcing fluid and nutrients back into the disc. This vacuum can also effectively draw bulges and herniations back into the disc.

Our non-invasive procedure may help you avoid surgery

**We also offer treatment options for auto accidents, sports injuries and general aches and pains.**

- Noninvasive Spinal Decompression • Chiropractic Care
- Massage Therapy • Physical Therapy

**Medicare Provider (in most cases Medicare, along with a secondary, will cover your cost for a visit). Most Insurance Plans Accepted.**

The patient and any other person responsible for payment has a right to refuse pay, cancel payment or be reimbursed for payment for any service, examination or treatment which is performed as a result of and within 72 hours of responding to the advertisement for the free, discounted fee or reduced fee service, examination or treatment.
